## Filtered Cyclonic Central Vacuum Systems

The Riccar Filtered Cyclonic central vacuum system uses a Teflon™-coated, lifetime HEPA filter to clean the air and protect the motor, while delivering impressive cleaning performance. The Filtered Cyclonic system separates all of the debris and collects it in the lower half of the power unit. Simply empty this container a few times a year and the rest of the vacuum system virtually takes care of itself. Many of the models include helpful reminder lights on the power unit to indicate when it needs to be emptied or the filter needs cleaning.

Model	Filtered Cyclonic	Deluxe Filtered Cyclonic	Premium Filtered Cyclonic	Ultra Filtered Cyclonic

## Performance HEPA™ Bagged Central Vacuum Systems

Riccicar Performance HEPA bagged central vacuum systems provide exceptional cleaning performance, while at the same time prevent you from ever coming in contact with the debris you've vacuumed. Every few months, simply remove the HEPA bag and replace it with a new one. Many of the HEPA bagged models also include helpful reminder lights on the power unit to indicate when the bag is ready to be changed or the filter needs cleaning.

Model	Performance HEPA	Deluxe Performance HEPA	Premium Performance HEPA	Ultra Performance HEPA
